**Torch App**:
Using Mobile Camera & LIGHT Sensors, develop torch App that turns on automatically based on low luminous ambient environments and turns off high luminous ambient environments.

1. Created an app using light and camera sensor.When the light sensor value is less than 10.Camera flash turn on. UI looks as below.

2. When the light sensor value is increased , camera flash turns off.And the light sensor value is updated in the UI.

TORCH OFF

Light Sensor Value : 8366.0
